

KALORA
HEART OF THE HOME

2024 Product Brochure

kalora

HEART OF THE HOME

Our mission at Kalora is to bring heating back to the realms of affordability with a high quality product that is designed to fit as comfortably in the contemporary stylings of a modern environment as it is in a traditional country homestead.

The team at Kalora have extensive experience designing, manufacturing and supplying quality heating appliances to Australian's for over 70 years. The Kalora range is the result of a collaborative effort to produce one of the most efficient, environmentally friendly heating ranges ever to be sold in the Australian market.

Designed and manufactured in our state of the art, world class facility each Kalora appliance is constructed and finished in the highest quality materials available. We combine high tech industrial design, robotic technology and quality materials to ensure years of "hassle free heating" with the backing of a 15 year firebox warranty on selected Kalora appliances.

designed

AND BUILT TO LAST

- ✔ Kalora's range of radiant and fan forced convection wood fires are engineered to efficiently heat homes up to 300m².
- ✔ All Kalora wood fired appliances meet or exceed the 2019 Australian Standards for emissions and efficiency.

- ✔ Premium quality Senotherm high temperature paint is the standard finish on all Kalora appliances.
- ✔ High alumina silica firebricks included in our wood fired appliances improve efficiency, reduce emissions and maximise the life of the firebox.
- ✔ Kalora wood fired appliances are designed to maximise burn times and fulfill our obligations to reduce emissions under the Australian Standard.
- ✔ Don't have a chimney? Not a problem, Zero clearance solutions are available for all Kalora inbuilt wood & gas fired appliances.
- ✔ Kalora appliances include high quality, low maintenance fireproof glass that is made in Japan.
- ✔ Our "clearview" air wash system keeps the fireproof glass clear and cleaner, for longer.

striving towards

A SUSTAINABLE FUTURE

KALORA IS COMMITTED TO ENVIRONMENT SUSTAINABILITY AND PROMOTES THE USE OF RENEWABLE ENERGY.

We support good forestry practices and ongoing improvements in wood burning stoves and heaters that use firewood. Firewood serves an important role in Australia's domestic heating sector and is an affordable heating option for many families.

As a renewable fuel source sustainability sourced firewood does not add to a net greenhouse gas production; in fact International pressure to reduce greenhouse gas emissions are highlighting wood fired appliances as a key contributor to them achieving their emission targets.

When sustainably managed, firewood recycles carbon from the atmosphere. Firewood plantations can also serve other ecologically desirable functions including wastewater treatment, salination reduction, erosion control, wildlife habitat and aesthetics.

Using firewood to heat your home is the most sustainable form of heating and far more efficient and environmentally friendly alternative to electric heating which relies on base load power generated by coal fueled power stations.

425R

Beautifully crafted compact and affordable without compromising on performance and efficiency.

Small in size, the Kalora 425R is the perfect investment for a cottage, holiday house or man cave.

THE BENEFITS

- 1 SMALL BUT MIGHTY**
Ideal heating solution for a cottage, mancave or holiday house
- 2 DUAL AIR CONTROLS**
Achieve a better, more efficient burn with dual air controls*
- 3 KEEPING IT TRADITIONAL**
Cast Iron door and stylish features enables the 425R to create a cosy ambiance like no other.

Accent

The Kalora Accent inbuilt wood heater has been specifically designed for installation into existing masonry fireplaces overcoming the inefficiencies associated with traditional open fires such as excessive fuel burn, uncontrollable heat levels and energy that is lost straight out of the chimney.

The Accent also accommodates for those who love the look of an inbuilt wood heater but do not have an existing open fireplace. Our zero clearance solutions avail the opportunity to install the Kalora Accent into a timber-framed wall with the need for only minimal clearances.

THE BENEFITS

- 1 PERFECT FOR THE PRE-EXISTING**
Designed to fit into existing masonry fireplaces to overcome inefficiencies giving you more control.
- 2 ZERO CLEARANCE OPTION**
Allows you to install the Accent into a timber-framed wall with minimal clearances.
- 3 MINIMALIST DESIGN**
Clean lines and minimalist features, paired with gentle touch controls, allow the flame to be the focal point of the room.

TECHNICAL SPECIFICATIONS

-  Heat up to 280m²
-  Firebox: 600w x 480d x 354h

PROFESSIONAL INSTALLATION

It is a requirement that all Kalora solid fuel and gas appliances are fitted by a qualified, licensed installer whose work complies with local council regulations, Australian standards and manufacturer's specifications. Failure to correctly install is extremely dangerous, will void any warranty claims and may compromise any future insurance claims.

Due to our policy of continuous improvement of our products and services, technical specifications and claims, correct at the time of going to print, may be subject to variation without prior notice. Kalora has endeavoured to ensure that the information in this document is correct and fairly stated, but does not accept liability for any error or omission.

Kalora Pty Ltd accepts no liability whatsoever for their interpretation of AS/NZS 2918-2001, AS/NZS 4012-4013. All heating capacities quoted are based on units tested with quality hardwood. Minimal performance reduction may result due to large glassed areas, vaulted ceilings, draughts or insufficient insulation. We reserve the right to alter specifications without

notice. The images depicted in this brochure are digitally produced for display purposes only and are not representative of the standard required to meet warranty specification. The effectiveness and performance of the overnight burning is influenced significantly by individual installation and environmental conditions and the quality of fuel used.
